

We are looking for you: Laboratory technician (BTA or MTA) in cell culture

faCellitate (www.facellitate.com) is a spin-off from BASF's R&D and has successfully completed the seed program within the BASF company builder Chemovator. faCellitate's platform technology is based on polymeric coatings, providing easily applicable, cell- and protein repellent passivation for thermoplastic and glass surfaces. Chemical modification of the coatings allows for modular, biologically active surfaces for future scientific needs in a broad range of high-end applications.

We are looking for a motivated laboratory technician from January 2022. Location: Heidelberg.

Your role

- Implementation of established cell culture experiments and establishment of new cell culture protocols
- Schedule experiments and monitor cell culture articles in stock, independently
- Support administrative processes in the team such as invite offers

You offer

- Completed vocational training (BTA or MTA) or master's degree in biology, biotechnology or molecular biology with work experience
- Practical experience in cell culture (primary cells, cell lines and induced pluripotent stem cells), molecular biology and cell analyses methods e.g. light- and fluorescent microscopy, immunofluorescent staining, FACS analysis
- Initial experience in 3D cell culture (spheroid culture, scaffold-based culture) and biomaterials would be desirable
- Excellent communication (german/english) -and organization skills and high flexibility
- Competent handling of MS-Office applications (MS Word, Excel, Power Point)
- Willingness to acquire new skills and knowledge to support the development of new cell culture products
- You describe yourself as a creative, big team player and you love to work in a changing environment

We offer

- Flexible working time in a start-up environment together with a young dynamic team
- Contribution to exciting research project in a new fully equipped laboratory with the possibility to get in touch with other start-ups and technologies
- A competitive salary and a permanent contract

Are you interested?

Nothing is set in stone yet, so your input is highly welcome. Please contact Dr. Annamarija Raic, annamarija.raic@facellitate.com, with your relevant documents. We are looking forward to hearing from you!
